

IS YOUR WEBSITE SAFE AND ALIVE? HAS IT SUFFERED FROM A VIRUS OR MALWARE?

Sign Up Now For Our Exclusive:

WEBSITE SCAN & FIX PACKAGE

This package will run quarterly
scans on your website to check
vulnerabilities for things like:

- SQL Injections
- Cross Site Scripting (XSS) Attacks
- URL Redirection
- Emerging Threats Such as Slowloris
- Server Issues for Things Like Latest Patches

The greatest part of this offer is that your rate is locked in! If any issues are found that need to be addressed from a scan, we will make sure they are taken care of. We will follow-up with your hosting company to address any steps they need to take to correct the problem. If programming changes are needed, we will update the code in order to keep up with the latest threats found during the scan.

WHITE LABELING IS AVAILABLE – SO, SELL OUR SERVICE UNDER YOUR NAME!

Bitochon Technologies, LLC
