

Medical Billing NY

Medical billing is a lucrative industry that takes over the process of following up on claims submitted to insurance companies that have never been paid for. Many times the healthcare practitioner is frustrated at the insurance companies that are not paying up what they owe so they hand over the claim to a medical billing company who exerts their efforts in trying to retrieve the payment. When the medical biller finally receives overdue payment they pocket a percentage.

As in many profitable industries there is competition and everyone wants to be optimized to the T to facilitate a lot of traffic and hopefully a lot of interested customers. One prospering company approached us to request our help in optimizing their content and redesigning their methods to be indexed higher on the search engines. Within a couple of weeks, their rank was rising and traffic was flowing. They were really happy with our work, but we weren't finished yet. We aim for the highest so we reviewed our efforts and adjusted the keywords here and there. The first week of January 2010 just a couple of months/ a mere x amount of time since we had first started, our customer was ranking first on both Google and Yahoo for 'medical billing new york'

Or we could do this:
